

Dear

We are pleased to offer you the opportunity to apply to National Grid's Hinkley Connection Project education fund.

National Grid is passionate about encouraging the next generation of engineers to take an interest in STEM subjects (science, technology, engineering and maths). Schools in local authority areas affected by the project are invited to apply for a grant of up to £500 for primary and £1,250 for secondary. The grants are to be used for the purchase of STEM resources to support the teaching of these core subjects.

The Hinkley Connection Project is a new high-voltage electricity connection between Bridgwater and Seabank near Avonmouth that will connect EDF Energy's new nuclear power station in Somerset to UK homes and businesses.

Please apply here [INSERT LINK](#). The attached document offers further information about the awards programme and guidance on how to apply. The deadline for applications is midnight Friday 21st December 2018. Applications received after this date will not be considered.
