Introduction

This is the second version of the Supplementary Schools directory, and has been developed as part of the Supplementary Schools’ Co-ordination Project funded by the Neighbourhood Renewal Fund.

The aim of the directory is to raise the awareness of mainstream schools, parents/carers and other agencies of the range and type of provision available in the city and to promote their contact details.

There will inevitably be regular changes in the contact details etc. and so an updated version with useful links will be on the Bristol LA website on www.bristol-cyps.org.uk/services/eit-supplementary_schools.html

What are supplementary schools?

There are estimated to be over 2,200 supplementary (sometimes called complementary) and mother-tongue schools in England. These schools supplement mainstream education by providing educational opportunities for children and young people mainly from Black and minority ethnic communities or particular faith groups.

Supplementary schools are usually managed and run by local groups or community organisations, including newly arrived communities. They take place in a variety of venues including mosques, churches, temples, gurudwaras, community centres and schools. Most supplementary schools operate in the evenings and at weekends. In addition, there are a number of Black and minority ethnic organisations providing other supplementary educational support to young people such as advice, advocacy etc.
Activities of supplementary schools might include:

- helping children with their national curriculum subjects, (particularly Mathematics, English and Science)
- learning about the history and culture of the community
- teaching children their mother-tongue language and other languages of a cultural or religious significance
- teaching children about a particular religion
- curriculum enrichment activities such as trips, outings, arts activities
- rites of passage work, group work, role modelling etc.

Why are supplementary schools important?

Research has shown that supplementary schools can impact on young people’s achievement and participation.

Benefits for children and young people who attend supplementary schools can include:

- increased pupil motivation, self-esteem and confidence
- improved behaviour and social skills
- maintenance or development of home languages
- higher levels of achievement and attainment
- increased pride in, and valuing of, cultural heritage
- opportunities for leisure, fun and enjoyment
- reduced isolation for children and families in predominately white areas through linking with others from a similar linguistic and cultural background
- increased parental involvement in children’s learning
- new partnerships between schools and minority ethnic communities.

Ofsted’s Framework for Inspecting Schools (2003) requires inspectors to assess how well a school works in partnership with parents and local communities, including supplementary schools.

The Education Act 2002 now makes it easier for school governing bodies to provide facilities and services directly that benefit pupils, families and the local community. Governing bodies also have more flexibility to enter into
agreements with other partners to provide services on school premises.

The ‘Every Child Matters’ agenda and the developments relating to extended schools should mean that partnerships between mainstream and supplementary schools should become more important, in the moves to ensure pupils can ‘enjoy and achieve’ and ‘make a positive contribution’.

Working in partnership with mainstream schools

There can be significant differences in how mainstream and supplementary schools operate including:

- different approaches to discipline
- differences in how boys and girls are educated
- different syllabus or teacher styles

A school’s awareness of local supplementary schools, and good communication and partnership with them, can be an important element in promoting the inclusion of new arrivals and raising the achievement of BME pupils. Schools can develop this by:

- being aware of this list of supplementary schools in the local area, making contact with them and finding out about their work.
- ensuring that newly arrived pupils and families are provided with information about the range of provision
- liaising regularly with parents/carers and community groups providing supplementary and mother-tongue education
- pursuing joint funding bids
- planning with, and involving community groups when developing out-of-school-hours and holiday activities
- involving representatives from supplementary schools in governing bodies or inclusion groups supporting community groups’ provision to teach pupils’ home languages. This can include helping with resources, advising on teaching activities and providing opportunities for pupils to take GCSE and A level examinations in minority community languages
- offering community access to school facilities
- developing referral and information sharing systems

The role of supplementary schools in Bristol

Supplementary schools have existed in Bristol for many years. Some have focused on teaching particular communities about their religion or cultural issues, or providing an African centred curriculum, and others have focused on raising achievement. Traditionally, they have been run voluntarily by community members, providing valuable role models and support for young people, with some also accessing small grants from various sources.

The National Supplementary Schools’ Support Service was set up in 2001 and during 2002/3 employed a member of staff in Bristol to support the sector. The worker, Jemma Keegan, worked with BCESG (Black Communities Education Support Group) and the City Academy to organise two workshops for parents/carers, mainstream and supplementary schools in 2003, which resulted in a “Partnership and Collaboration Report”.

Last year, a significant amount of Neighbourhood Renewal Money (£150K) was distributed to the sector as part of the LA Action Plan to raise achievement. This was used to set up a new school, the Erondu Foundation, for young people of African Caribbean descent and multiple heritage backgrounds, as well as funding for existing schools such as Amana, Bristol Islamic Classes.

From 2006-8 Neighbourhood Renewal is funding the Supplementary Schools’ Coordination Project to maintain and develop the Supplementary Schools’ Forum, provide training and support to individual schools and to develop a sustainable strategy for the sector.

Mainstreaming Supplementary School Support Project

Funding from Neighbourhood Renewal, Community at Heart and other sources has contributed to the development of an exciting initiative based at the City Academy, the
Mainstreaming Supplementary School Support Project. This has been developed over three years and initially linked particular mainstream schools (City Academy, Fairfield, Whitefield and Speedwell) to key supplementary schools for Muslim students, Amana (for Somali students) Bristol Islamic Classes and the Bangladeshi Association. Over the past year it has extended this remit to include a primary project and an African Caribbean achievement project.

Over the past two years they have run successful GCSE revision classes, and supporting Year 9 SATs revision.

An initial comparative analysis showed that within the target group of MSSP students, 75% of students attending the project achieved 5 or more A* to C compared to 33% of the control group who did not attend. (A full evaluation is available on the website address above.)

Evaluation of Supplementary Schools in Bristol

In 2005 a full evaluation of supplementary provision in Bristol was commissioned by the local authority. Liz Cousins’ report, “Developing Effective Partnerships” is available on www.cyps.org.uk/services/pdf/supp_schools_eval.pdf and clearly articulates the impact supplementary schooling is having. She says “At their best, supplementary schools and mainstream schools link together to contribute to the experience and attainment of children and where this is taking place in genuine partnership the impact on Floor Targets is demonstrable and impressive.”

Supplementary Schools forum

The Supplementary Schools’ Forum meets at least termly and brings together all Supplementary Schools to share ideas, good practice etc. It is supported by the Supplementary Schools’ Coordinator. As part of his role, he is developing a training programme for supplementary schools baseline and quality assurance standard’s and is organising conferences and good practice visits.
